Every project is unique and every project site is different.

BT Transport & Logistics' core business is built around transport projects that are more extensive, more complex and more challenging than the average freight.

We deal with these types of loads every day.

Our Services – Australia-wide and remote

We offer complete Supply Chain Solutions, as well as end-to-end solutions or stand-alone services:

- Movement of over-dimensional (oversized, overweight) cargo and equipment
- Bulk & break bulk
- Full loads and individual consignments (palletised, weather sensitive, temperature controlled)
- Off-wharf freight handling
- Container freight (including stuffing and de-stuffing)
- Storage and warehousing
- Live tracking
- Site survey & feasibility studies (routes, weather, existing infrastructure etc)
- Route planning
- Cost modelling
- Portable accommodation & mining camp movements
- Health, Safety and Environmental Management

As an experienced 3PL provider to many industries, we have the required expertise to operate in complex and one-off supply chain structures.

Industries

Automotive
Civil
Construction
Defence
Government
Mining
Oil & Gas
Power & Energy
Renewables
Resources

Types of Freight

Bulk materials
Commodities, e.g. pipes
Process equipment, e.g. tanks
Modular plant
Large, high-value items, e.g. turbines
Construction equipment
Temporary accommodation

We operate and maintain a
core fleet of over 430
vehicles and trailing equipment

Our Capabilities

Our project logistics team members are experts in their field, and they make their decisions based on many years of experience.

We follow best project logistics practices and techniques, and work with a large contractor base that meets our high standards.

We have a large company-owned and maintained core fleet of over 430 modern prime movers, floats and trailing equipment. Our extensive range of vehicles and trailer configurations enables us to move all types of freight.

Specialised Fleet & Equipment

- A-Trailers, B-Trailers, B-Doubles and B-Triples
- Skeleton trailers with container pins (container transport)
- Sideloaders (container transport)
- Flat deck trailers
- Drop deck trailers (with or without ramp)
- Extendable trailers
- Open top trailers
- Platforms
- Flat racks

Project Handling

- Industry Certifications, including CSG Level 1 and Bechtel A+
- Multi-modal transport (rail, tug & barge, heavy lift)
- Nationwide network to efficiently service your projects, regardless of your location
- Transport and warehousing facilities in all capital cities and major regional towns
- Integrated Logistics, Transport and Warehousing Solutions

Technology & Compliance

We utilise technology to achieve operational efficiencies and maintain industry compliance:

- All our vehicles are equipped with GPS live tracking equipment and monitored through Fleet Pursuit
- We use Work Diary Mate and Logchecker for fatigue management
- Rapid Global is used as our contractor management and employee engagement platform

We operate under NHVAS and WA and national heavy vehicle accreditations.
