**Can Do.**

BT Transport & Logistics is a trusted partner of many clients in the Military and Defence sector, and as such we have acquired substantial experience and know-how specific to the industry.

## Our Services

All of our Defence Logistics services are available nationwide and include:

- Defence vehicle cartage & recovery – door to door
- Project mobilisation and demobilisation
- Consolidation opportunities
- Project design & management
- Heavy haulage services & distribution
- Over-dimensional distribution
- Rail intermodal services
- Off-wharf distribution & storage

We provide complete transport and logistics solutions, including:

- Route planning
- State permits
- Overhead utility clearances
- Council approvals
- Pilot escorts
- Police escorts

We also offer integrated, flexible offsite storage options in all capital cities.

## Why Defence customers choose BT

We have established links directly with ADF and Defence suppliers, supporting their specialised and often unique logistical tasks, including, but not limited to:

- PI priority movements
- Large volume manoeuvres
- Optimised uplift and delivery requirements in line with ADF personnel/security escort requirements and strictly critical timelines.

### Solid Defence Value Propositions

We have a working knowledge of the Standing Order Process via the Panel members, and are intimately working with other recognised defence suppliers, supporting ADF movements with in-field sustainment programs

## Our Capabilities

Our Defence Logistics team can support you with:

- Extensive fleet capacity—flexible availability nationwide
- Uplift and delivery anywhere in Australia
- Mobilisation and demobilisation of projects within tight timeframes
- Project in-field sustainment programs
- Airside / Wharf-side ‘load master’ services
- Specialist dedicated services
- In-house Depot Sustainment Programs
- Over-dimensional distribution
- Capital city and remote crane services
- Provision of any kind of specialised equipment needed

## Specialised Fleet & Equipment

We own more than 400 specialised vehicles and pieces of trailing equipment, including modern prime movers equipped with IVMS, as well as:

- Tilt trays
- Sideloaders
- Vehicle carriers
- Drop deck trailers (with or without ramp)
- Extendable trailers
- Open top trailers
- Offsite materials handling equipment

### Communication

Our transparent communication process allows for optimised project planning, problem solving and performance monitoring

## Safety & Compliance

Safety and compliance are paramount to us. We are aware of our role in the Chain of Responsibility in road safety, and take progressive commitment to compliance regimes.

Our continued success working within extremely demanding OHS regulated industries such as mining and construction provide a sound platform to support defence-related security and safety regulations.

We operate under NHVAS and WA and national heavy vehicle accreditations.

### Multimodal transport

We utilise the road, rail, sea and air networks to ensure optimum distribution solutions are achieved
